

WheelHouse is a fully integrated, subscription-based Computerized Maintenance Management System designed specifically for the yachting industry. WheelHouse leverages the significant benefits of cloud computing while also supporting off-line access. Turnkey implementation services significantly reduce implementation time and cost. The significant benefits of WheelHouse include:

- Improved vessel safety and reliability
- Improved visibility into the maintenance process
- Lower life cycle costs
- Easier maintenance planning
- Online parts ordering
- Regulatory Compliance
- Fast and easy access to all vessel documentation

**Now Introducing:  
WheelHouse Underway**

### Master Equipment List

- Equipment Description
- Make, Model, S/N Details
- Warranty Management
- Manufacturer Contact Info

- ISM / Class Requirements
- Safety Management Integration

### Comprehensive Reports

- On-screen and Printed Reports
- Export to Excel / csv

### System Access

- Accessible via PC / Mac
- Tablet & Smartphone Access
- Off-Line Syncing with WheelHouse Underway

### Technical Support

- Unlimited Data Storage
- Continuous Backups
- Free Feature Updates

### Customer Support

- Knowledge Database
- Unlimited Phone Support

## Strategic Sourcing and Parts Logistics

Because we are OEM/dealer agnostic we can source virtually anything you need from our hundreds of established wholesale suppliers. Consider WheelHouse Technologies for strategic sourcing and equipment/parts supply for the following:

- SeaKits Brand Parts Kits
- Deck and Safety Equipment

## Damage Control Equipment

All of our SeaKits Brand Damage Control Kits are available in stock kits and components may be purchase separately. In addition, any of our kits may be modified to fit a particular application.

## Condition Monitoring

SeaKits Brand Oil and Coolant Analysis Kits will maximize equipment performance and reliability by identifying minor problems before they become major failures. Available for engine oil, transmission oil, gear oil, hydraulic oil, engine coolant, and fuel.

## Owner's/Systems Manuals

Owner's Manuals can be designed in conjunction with WheelHouse Yacht Solutions. Like WheelHouse, our manuals are easy to use and content-rich. They can be customized to include operating instructions, maintenance instructions, regulatory requirements, or other custom requirements. Manuals can be developed to comply with ABYC, Class, and other requirements, as needed.

## Availability

WheelHouse and related services are available direct from WheelHouse Technologies or from our partners. For a list of partners, please visit [www.WheelHouseTech.com/partners](http://www.WheelHouseTech.com/partners).
