

WHEELHOUSETM
MARINE MAINTENANCE SYSTEMS

You Have More Important Tasks Than Managing Maintenance Schedules

From commercial fleets to private yachts, WheelHouse provides an innovative solution that simplifies the management of vessel maintenance, spare parts, and documents.

Whether responsible for a single vessel, or a fleet across the globe, WheelHouse puts contemporary maintenance management at your fingertips that results in improved vessel availability, reliability, and safety.

When introduced in 2007, WheelHouse was the first widely accepted, Cloud-based, vessel management solution on the market.

Today, WheelHouse is available on virtually any device with an internet connection. Off-line functionality is available using WheelHouse Underway, which synchronizes with the Cloud once an internet connection is available.

WheelHouse goes beyond a software solution to provide implementation services that take the risk out of deploying technology solutions and new business processes.

From advisory to turnkey, our proven implementation methodology ensures that the application is up and running quickly and effectively.

- Asset Management
- Document Compilation and Repository
- Contact Management

- Planned Maintenance Guidelines
- Maintenance Process / Review Auditing
- Walkdowns and On-site Training
- Technical Support

- Maintenance Forecasting
- Work Order Management

- Maintenance Cost Reporting
- Utilization Tracking
- Key Performance Indicators (KPI)

“

By Failing To Prepare,
You Are Preparing To Fail.

-Benjamin Frankin

”

Fluids Analysis

SeaKits Brand Fluids Analysis Kits are available for: engine oil, transmission fluid, gear oil, hydraulic oil, coolant, and fuel. Fluid analysis is one of the most important methods to monitor the condition of your equipment to identify potential failures before they occur.

SeaKits Fluids Analysis is a diagnostic, preventive maintenance tool for monitoring and evaluating fluid and equipment conditions. It allows you to maximize equipment performance and reliability by identifying minor problems before they become major failures.

Damage Control Kits

SeaKits Brand Damage Control Kits are recommended for all flooding and emergency repair situations. SeaKits provide the most complete off-the-shelf flooding damage control kits available on the market with three stock Kits to choose from, along with additional kits and accessories available to cover any vessel.

Kits are packaged in water resistant or waterproof dry boxes, as applicable, and include a variety of patches, plugs and tools for any aspect of damage repair. All kits also include the SeaKits Damage Control Guide, a comprehensive damage control guide with repair methods, flooding tables, training tips, and more.

Spare Parts Outfitting

SeaKits Spare Parts Outfitting is a single point of contact for complete outfitting of new and refit yachts. Don't spend hours finding and ordering supplies from multiple suppliers while coordinating complicated shipping requirements. SeaKits has done the sourcing work for you.

Our Stem-to-Stern Supply Commitment provides one stop shopping for all your parts requirements. We specialize in organizing parts into logical kits for on-board storage. Our Spare Parts Kits ensure that your spares are properly packaged, labeled, and stored in heavy-duty water-resistant boxes that will protect your parts from the hostile environment found aboard.”
